

List Of Papers

Please send to nicoleta@preda.fr an email with a list of 3 papers, in the decreasing order of your preferences. If the requests are un-balanced, e.g., all of you opt for the same paper, then I have to re-balance the load. If more than two students are assigned the same paper, they should not discuss the paper between them.

- [Rapidly Integrating Services Into the Linked Data Cloud](#). M. Taheriyani, C. A. Knoblock, P. A. Szekely, and J. L. Ambite, in ISWC, 2012.
- [Deriving Intensional Descriptions for Web Services](#). Maria Koutraki, Dan Vodislav, Nicoleta Preda, in CIKM 2015.
- Section 13.2 Top-down Evaluation. [Abiteboul & al: Foundations of Databases](#)
- Section 13.3 Magic-Set Evaluation. [Abiteboul & al: Foundations of Databases](#)
- [Querying Data under Access Limitations](#). Andrea Calì, Davide Martinenghi, in ICDE 2008.
- [Querying with Access Patterns and Integrity Constraints](#). Benedikt, Leblay, and Tsamoura, in PVLDB 2015.
- [Spark SQL: Relational Data Processing in Spark](#), Benedikt, Leblay, and Tsamoura in SIGMOD 2015.
- [Towards a Streaming SQL Standard](#), in PVLDB 2008.
- [The CQL continuous query language: semantic foundations and query execution](#). A. Arasu and S.Babu and J. Widom, in VLDB J. 2006.
- [THEMIS: Fairness in Federated Stream Processing under Overload](#). Kalyvianaki, Fiscato, Salonidis, and Pietzuch, SIGMOD 2016

Since the papers have not the same difficulty, the evaluation of the report will take into account the difficulty of the paper.
